REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning and Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

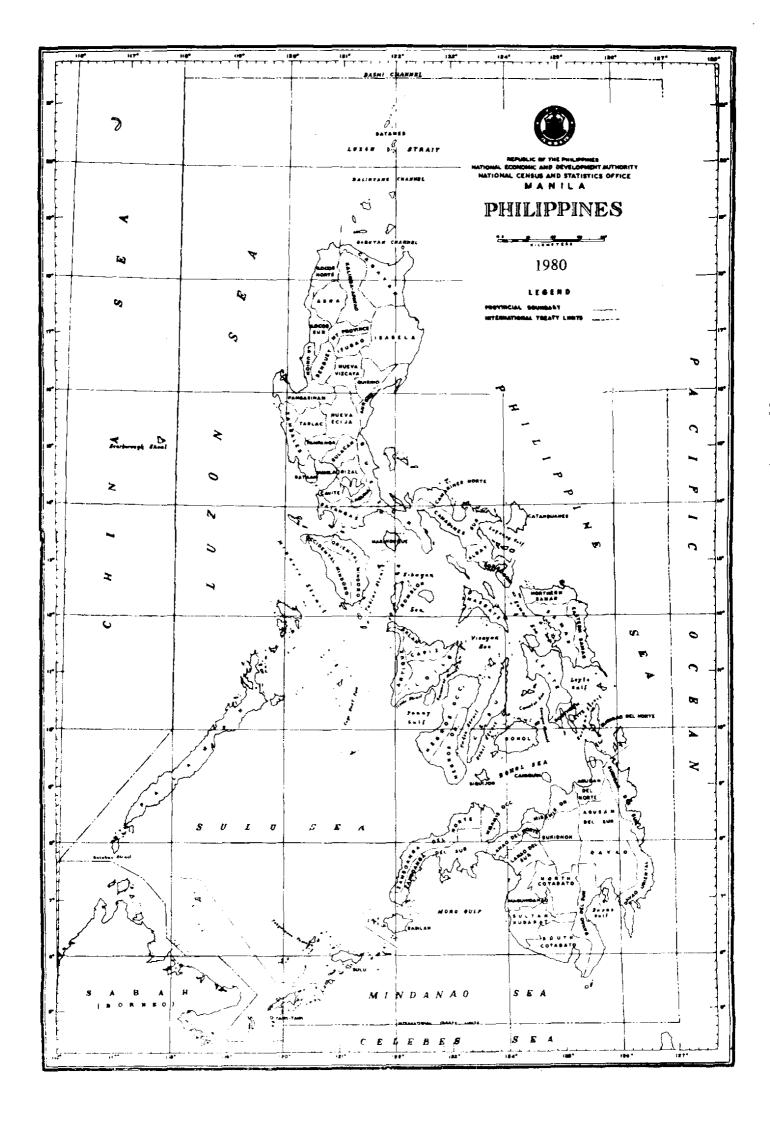

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manifa, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families:
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial — a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6 Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

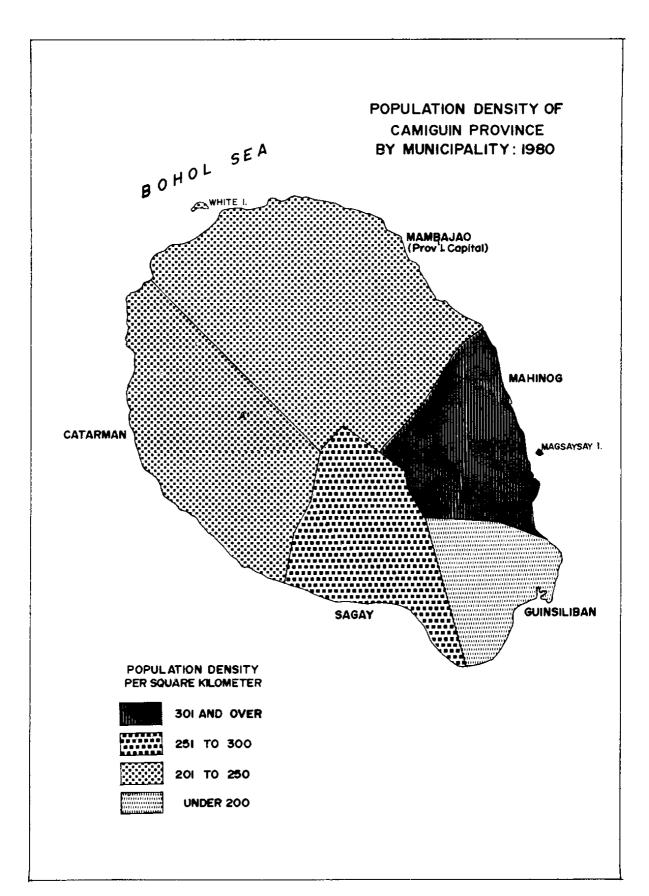

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Camiguin: A Brief Analysis

Camiguin is an island province lying south of the Bohol Sea and north of Misamis Oriental of which it was a part before it became a separate province on June 18, 1966. The second smallest province in the country today, Camiguin occupies a land area of 229.8 square kilometers which is only 0.1 percent of the country's total land area. The provincial terrain is generally rocky and hilly with stretches of beautiful white-sand beaches. The land-scape is dominated by seven volcanoes, one of which rises 457 meters above sea level. Located in the municipality of Catarman, Mt. Hibok-hibok is one of the active principal volcanoes in the Philippines.

Surrounded by bays and coasts, Camiguin is rich in marine resources. Fish production is mostly derived from the Bohol Sea.

The province consists of five coastal municipalities with Mambajao as its capital.

POPULATION

Camiguin's population on May 1, 1980 totalled 57,126, representing an increase of 4,579 or 8.71 percent since 1975. Annual geometric growth rate of the population during the 1975-1980 intercensal period averaged 1.69 percent, an encouraging trend for a growing province. Between 1970 and 1975, the population declined by 2.53 percent, from 53,913 to 52,547. Hence, the population density changed considerably from 234.6 in 1970, 228.7 in 1975 to 248.6 inhabitants per square kilometer in 1980.

The province is still predominantly rural, although the proportion of urban population increased from 22.94 percent to 26.59 percent while that of the rural population decreased from 77.06 percent to 73.41 percent. The proportions of rural males to the total males and of rural females to the total females decelerated to 73.75 percent and 73.07 percent, respectively. It is observed that the proportion of urban males (26.25%) is almost equal to that of urban females (26.93%).

TABLE A – URBAN-RURAL POPULATION BY SEX, CAMIGUIN: 1970, 1975 AND 1980

Area Classification	19	80	197	75	1970		
and Sex	Number	Percent	Number	Percent	Number	Percent	
Total	<u>57,126</u>	100.00	52,547	100.00	53,913	100.00	
Male Female	28,900 28,226	50.59 49.41	26,823 25,724	51.05 48.95	27,122 26,791	50.31 49.69	
Urban	15,187	<u>26.59</u>	12,056	22.94	11,638	21.59	
Male Female	7,585 7,602	13.28 13.31	6,121 5,935	11.65 11.29	5,857 5,781	10.87 10.72	
Rural	41,939	<u>73.41</u>	40,491	77.06	42,275	78.41	
Male Female	21,315 20,624	37.31 36.10	20,702 19,789	39.40 37.66	21,265 21,010	39.44 38.97	

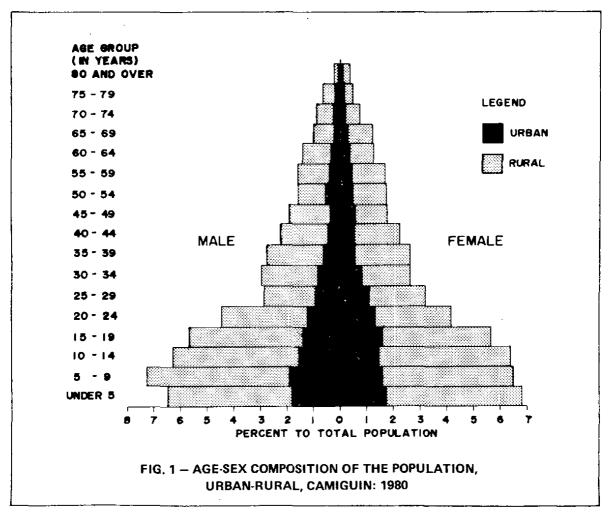

Table A shows the distribution of the population, male and female, in urban and rural areas in three censal years.

Of the total population, 28,900 were males and 28,226 were females, or a sex ratio of 102.39. In 1975, the ratio stood at 104.27, the males, likewise, outnumbering the females. The rural population with a ratio of 103.35, slightly exceeded the overall sex ratio. In contrast the urban sex ratio declined to 99.78, much lower than the 1975 ratio of 103.13.

Figure 1 presents the 1980 proportions of males and females, urban and rural, in five-year age groups, to the total population. As seen in the diagram, the rural and urban sectors deviate from the usual pyramid population structure which is characterized by declining percentages of males and females as the group increase in age. Deviations from the pyramid configuration occur more frequently among the urban males and occasionally among the urban females. In the rural areas, however, more deviations were noted among the females than among the males (Table 2).

AGE COMPOSITION

Changes in the population distribution by age show that the population has grown older within the last five years. Children 14 years of age or younger declined from 43.71 percent in 1975 to 39.80 percent. Consequently, the proportion of persons in the working or productive age group (15-64 years old) attained a substantial increase between 1975-1980. Similarly adults 65 years old and over rose from 4.56 percent to 5.69 percent. The median age of the population is older by 2 years, from 17 years in 1975 to 19 years in 1980.

Shown below is the broad-age structure of the population since 1970:

TABLE B — AGE COMPOSITION OF THE POPULATION, CAMIGUIN: 1970, 1975 AND 1980

Age	19	80	19	75	1970		
Composition	Number	Percent	Number	Percent	Number	Percent	
Total	57,126	100.00	52,547	100.00	53,913	100.00	
0-14 years	22,737	39.80	22,965	43.71	23,608	43.79	
15-64 years	31,137	54.51	27,184	51,73	28,067	52.06	
65 years and over	3,252	5.69	2,398	4.56	2,238	4.15	

Due to an increase in the proportion of persons in the productive age group, the dependency ratio (number of dependents for every 100 persons in the productive age group) dropped abruptly by 9.83, from 93.30 to 83.47. Urban and rural dependency ratios varied considerably. Of the urban population, 38.11 percent are 0-14 years; 56.14 percent, 15-64 and 5.75 percent, 65 years and over, resulting in a dependency ratio of 78.13. On the other hand, the rural population reached a ratio of 85.48 as 40.41 percent are under 15 years of age; 53.92 percent, 15-64 and 5.67 percent, 65 years and over (Table 3).

MARITAL STATUS

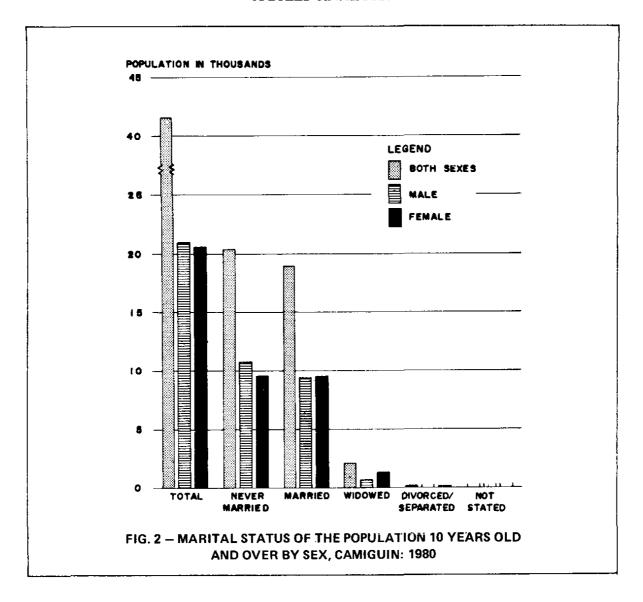

Since 1970 never married persons always exceeded other marital status categories of the population 10 years old and over. In 1980, the never married totalled 48.94 percent, slightly lower than the 1975 proportion of 50.71 percent. Married individuals showed an upward trend. After an increase of 2.77 percentage points between 1970 and 1975, an increase of 1.35 percentage points was observed in the proportion of married persons. The widowed and the divorced or separated rose from 4.66 percent to 5.08 percent and from 0.37 percent to 0.38 percent, respectively. Those who did not bare their status made up 0.03 percent.

The proportions of never married and married males varied more than their female counterparts. Of the males, 51.30 percent were single and 44.77 percent, married. Among the females, 46.53 percent were single and 46.38 percent, married. Females more likely lose their mates either by death, divorce or separation than males. About 6.57 percent of the females were widowed and 0.50 percent, divorced or separated, compared with 3.62 percent and 0.26 percent, respectively, for the males (Table 4).

The next table classifies the population 10 years old and over by sex and marital status in the last three censal years:

TABLE -- POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, CAMIGUIN: 1970,1975 AND 1980

Sex and	19	80	19	75	19	70
Marital Status	Number	Percent	Number	Percent	Number	Percent

Not stated	5	0.02	10	0.05	35	0.19

HIGHEST GRADE COMPLETED

Those reaching only the elementary grades substantially diminished by 7.56 percentage points to 56.76 percent, an indication that the proportion of persons ending up with higher educational attainment increased. Those who attended high school increased from 21.31 percent to 25.65 percent and persons continuing up to college, from 4.78 percent to 8.01 percent. Academic degree holders, likewise, rose from 2.73 percent to 3.90 percent. Only 0.10 percent did not state their highest grade completed.

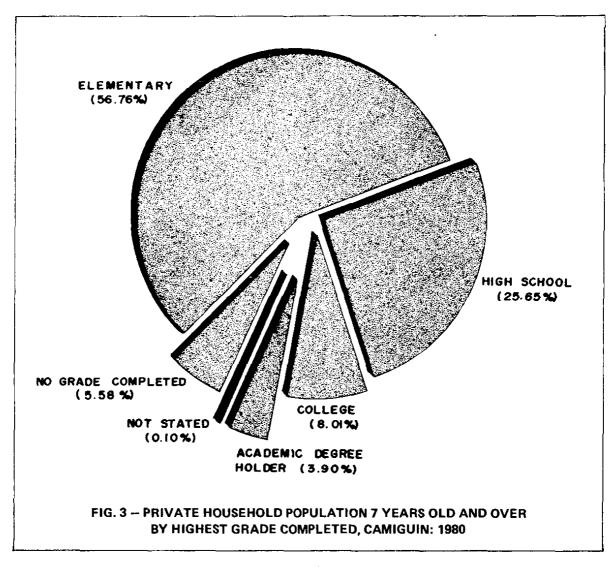

Of those having strictly elementary training, 28.82 percent finished any of the first three grades; 17.14 percent, the fourth grade; 14.02 percent, the fifth grade and 40.02 percent, the sixth or seventh grade. Less than two-thirds or 65.31 percent schooled up to the secondary level did not go beyond the junior year while 34.69 percent graduated from the fourth year. Over four-fifths of those who went on to college (81.55%) completed at most the third year and 18.45 percent, the fourth or higher year (Table 5).

Table D gives the distribution of the private household population 7 years old and over by highest grade completed in 1975 and 1980.

TABLE D ~ PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, CAMIGUIN:

1975 AND 1980

Highest Grade	193	80	19	75
Completed	Number	Percent	Number	Percent
Total	46,443	100.00	41,861	100.00
No grade completed	2,593	5.58	2,478	5.92
Elementary	26,360	56.76	26,925	64.32

College	3,719	8.01	2,002	4.78
Academic degree holder	1,810	3.90	1,143	2.73
Not stated	49	0.10	394	0.94

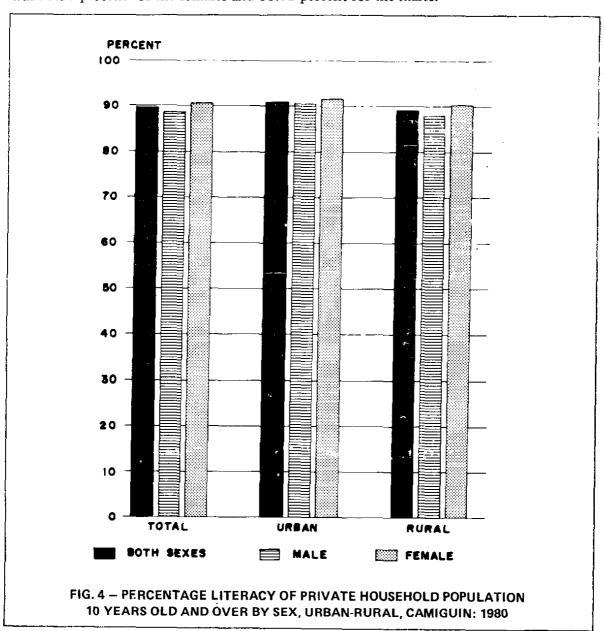

LITERACY

The rate of literacy for the population 10 years old and over stood at 89.69 percent, gaining a slight edge over 1970 when the rate was 88.47 percent.

Literate females constituted a larger percentage of the private household 10 years old and over than literate males, 44.88 percent as against 44.81 percent. Of the total literate population, females comprised 50.04 percent and males, 49.96 percent. It is interesting to note that of the private household females aged 10 and over, 90.73 percent were literate, while the corresponding figure for the males was 88.67 percent.

The literacy rate was higher in urban (91.12%) than in rural (89.17%) areas. In both areas, literacy was higher among females than among males. In the urban areas, female literacy rate stood at 91.68 percent and the males, 90.54 percent. In the rural areas, the rate was 90.37 percent for the females and 88.02 percent for the males.

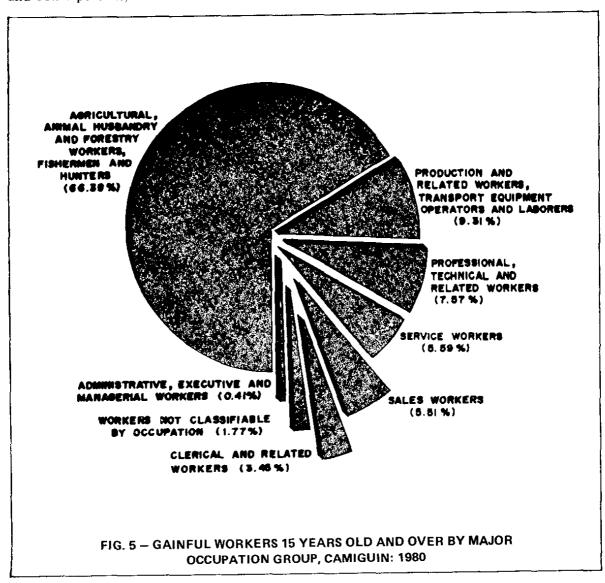

LANGUAGE OR DIALECT

Only five languages and dialects were reported spoken in the five municipalities of the province, with Cebuano predominating over all the others. Of the 10,042 private households, 10,003 or 99.61 percent speak this dialect. In two municipalities, Guinsiliban and Mahinog, no other dialect was reported except Cebuano. In the three other municipalities, Cebuano is likewise spoken by over 99 percent of the respective households.

Almost all households in the urban (99.25%) as well as in the rural (99.74%) areas speak Cebuano. The rest speak Lineyte-Samarnon (Waray), Hiligaynon (Ilongo), Aklanon and Palanan (Table 7).

GAINFUL OCCUPATION

Out of 34,349 persons 15 years old and over 16,293 are with gainful occupations, higher by 16.12 percent than the 14,031 gainful workers reported in 1975. Gainful employment is predominated by men; more than four-fifths or 83.03 percent are men and 16.97 percent, women.

The largest major occupation group, agricultural, animal husbandry and forestry workers, fishermen and hunters account for nearly two-thirds or 66.39 percent of the total gainful workers, despite a decrease of 7.88 percentage points from 1975. The proportion of production and related workers, transport equipment operators and laborers increased from 7.39 percent in 1975 to 9.31 percent; service workers, from 3.94 percent to 5.59 percent and clerical and related workers, from 2.25 percent to 3.45 percent. Professional, technical and related workers likewise gained 2.51 percentage points, from 5.06 percent in 1975 to 7.57 percent. However, sales workers slightly decreased from 6.03 percent to 5.51 percent and administrative, executive, and managerial workers, from 0.49 percent to 0.41 percent. Workers not classifiable by occupation, on the other hand, reached 1.77 percent, from 0.57 percent in 1975 (Table 8).

The succeeding table shows the distribution of the population 15 years old and over by major occupation group in the last two censal years:

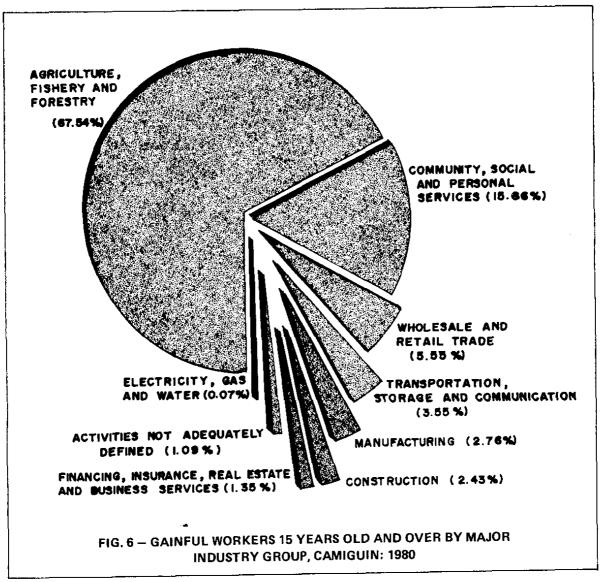

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, CAMIGUIN: 1975 AND 1980

Major	19	80	19	75
Occupation Group	Number	Percent	Number	Percent
Total	16,293	100.00	14,031	100.00
Professional, technical and				
related workers	1,234	7.57	710	5.06

Workers not classifiable by	- , - ,	2.03	1,007	1.57
occupation	289	1.77	80	0.57

INDUSTRY

Agriculture, fishery and forestry — the single largest major industry group, has the largest share of the total gainful workers with 67.54 percent. Producers of agricultural crops chiefly comprise this group, making up 80.96 percent, followed by those in fishery with 14.01 percent and agricultural services, 4.42 percent. The remaining 0.61 percent are in forestry and in the production of livestock, poultry and other animals. Community, social and personal services provide jobs to 15.66 percent. Workers in this industry group tend to

crowd within three areas: education services (33.40%), personal and household services (28.34%), and public administration and defense (19.68%). Wholesale and retail trade employ 5.55 percent with workers engaged mostly in the retail (93.47%) rather than in the wholesale trade (6.53%). Transportation, storage and communication constitute only 3.55 percent; manufacturing, 2.76 percent; construction, 2.43 percent; financing, insurance, real estate and business services, 1.35 percent; electricity, gas and water, 0.07 percent and activities not adequately defined, 1.09 percent (Table 9).

MIGRATION

Most (97.57%) of the private household population 5 years of age and older were residents of the same municipality where they lived on May 1, 1975 and on May 1, 1980. Of these 49.75 percent were males and 47.82 percent, females.

Those who changed residence between 1975 and 1980 were largely migrants from other provinces (2.10%). Migrants from another municipality of Camiguin made up only 0.30 percent and immigrants from foreign countries, 0.03 percent.

Movements within the province and from another province involved more females than males. Likewise, former residents of foreign countries were mostly females (0.02%) than males (0.01%). A greater proportion of those who changed residence settled in rural than in urban areas (Table 10).

TYPE OF BUILDING

From 97.27 percent in 1970, the proportion of households occupying single houses rose to 98.77 percent in 1980. The remaining 1.23 percent occupy the following types of buildings: 0.58 percent, improvised (barong-barong); 0.20 percent, apartment/accesoria/condominium/row house/etc.; 0.30 percent, commercial/industrial/agricultural; 0.10 percent, duplex; and 0.05 percent, other housing unit such as natural shelter, boat, etc.

Most of the households living in single houses (74.02%) reside in rural areas; only 25.98 percent of these structures are located in urban areas. Household living in other housing units are all found in rural areas. On the other hand, more than half (60.34%) of those living in improvised structures are urban dwellers; 39.66 percent are rural residents. Households living in duplex houses are equal in proportion (50.00%) for both areas. Two thirds, or 66.67 percent of the households in commercial/industrial/agricultural buildings are located in urban areas and 33.33 percent, in rural areas. However, those living in apartment/accesoria/condominium/row house/etc. are entirely urban households (Table 1).

The following table gives the numbers and percentages of households in the different types of buildings in the last ten years:

TABLE F — NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, CAMIGUIN: 1970 AND 1980

Type of Building	19	80	19	70
	Number	Percent	Number	Percent
Total	10,042	100.00	8,637	100.00

Other collective living quarters				0.01
(military camp, etc.)		_		

TYPE OF OCCUPANCY

More than four-fifths (86.37%) of all the private households in Camiguin own the dwelling units they occupy; 7.84 percent are rent-free occupants; 5.38 percent, tenants or lessees; and 0.41 percent, subtenants or sublessees (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Approximately 57.15 percent of the total private households live in dwelling units roofed with cogon or nipa and 41.21 percent, with galvanized iron/aluminum. Dwelling units with roofs of tile/concrete/brick/stone are occupied by 0.60 percent; of makeshift or salvaged materials, 0.55 percent; asbestos, 0.15 percent; and other materials such as anahaw, 0.34 percent.

Wood or plywood walls the exterior of dwelling units occupied by 52.83 percent of the households. Units with walls of bamboo or sawali are occupied by 23.36 percent; mixed tile/concrete/brick/stone and wood/plywood, 17.54 percent; cogon or nipa, 2.42 percent; tile/concrete/brick/stone, 1.65 percent; makeshift or salvaged materials, 1.44 percent; galvanized iron or aluminum, 0.51 percent; other (anahaw, etc.), 0.20 percent and asbestos, 0.05 percent (Table 2).

YEAR BUILT

Newly built dwelling units (those erected between 1976 and 1980) shelter 27.90 percent of the households. More than one-fifth, or 21.92 percent were constructed in 1971-1975; over one-fourth or 25.29 percent, in 1961-1970; 15.08 percent, 1951-1960; 4.71 percent, 1942-1950 and 5.10 percent, 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

Over eighty percent of the households occupy dwelling units with floor area at most 49 square meters: 48.50 percent are sheltered in units less than 30 square meters; 32.45 percent, 30-49 square meters; 8.09 percent, 50-69 square meters and 4.66 percent, 70-99 square meters. The remaining 6.30 percent live in spacious dwelling units distributed as follows: 3.15 percent, 100-149 square meters; 1.10 percent, 150-199 square meters; 0.85 percent, 200-249 square meters; 0.80 percent, 250-299 square meters and 0.40 percent, 300 square meters and over (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 8,673 owner-occupants, 69.79 percent own the land where the structure is erected. Less than one-tenth, or 9.76 percent are lessees or sublessees; 6.20 percent, farm lessees or agricultural tenants of landowners and 4.68 percent, of other legal tenure. Those with no tenure (squatter, etc.) make up 9.57 percent (Table 4).

KIND OF LIGHTING FACILITIES

Most (93.51%) of the households use kerosene for lighting. Electricity is used by 5.59 percent; liquefied petroleum gas (LPG), 0.75 percent; oil, 0.10 percent and other kinds, 0.05 percent. Comparatively, the use of kerosene is higher among rural (98.31%) than among urban households (80.16%). Almost one-fifth (19.08%) of the households in urban areas use electricity; 0.38 percent, liquefied petroleum gas and another 0.38 percent, oil. In contrast, 0.88 percent of the rural households use liquefied petroleum gas; 0.74 percent, electricity and 0.07 percent, other kinds of lighting facilities.

SOURCE AND USE OF WATER SUPPLY

More than three-fourths of the total households use the faucet, community water system whether for drinking (78.88%) or for kitchen use (77.88%). For laundry purposes, 54.15 percent depend on the same source. Water from spring is used by 15.55 percent for drinking; 15.75 percent for kitchen use and 21.25 percent, for washing clothes. While 18.18 percent utilize water from lake, river, stream, etc. for laundering clothes, very few households rely on these sources for drinking (0.30%) and for kitchen use (0.65%). Few households get their water supply from tubed or piped deep well (3.84% each for drinking and for kitchen use and 2.25% for washing clothes). Among the least used sources are the dug well -0.77 percent for drinking, 1.17 percent for kitchen use and 3.21 percent for laundry use and tubed or piped shallow well -0.36 percent for drinking, 0.41 percent for kitchen use and 0.61 percent for washing clothes. Rain water is used by the least number of households: 0.30 percent each for drinking and for kitchen use and 0.35 percent for washing clothes (Table 6).

COOKING FUEL

Of the 10,042 households, 88.97 percent cook with wood or charcoal; 9.93 percent, kerosene; 0.85 percent, liquefied petroleum gas (LPG); and 0.25 percent, electricity. More than nine-tenths (90.18%) of the rural households use wood or charcoal compared to 85.62 percent of the urban households. The rest of the households in rural areas use kerosene (9.48%) and liquefied petroleum gas (0.34%). The corresponding proportions of urban-based households using the same kinds of cooking fuel are 11.18 percent and 2.26 percent with the remaining 0.94 percent using electricity (Table 8).

TOILET FACILITIES

Two types of toilet facilities commonly found in the province are the water-sealed with other depository type (40.30% of the total households) and the water-sealed with sewer or septic tank (25.35%). The closed pit (antipolo, etc.) constitutes 16.58 percent; open pit, 8.85 percent and other (pail system, etc.), 0.14 percent. Approximately 8.78 percent of the households still lack toilet facilities.

Of the urban households, 46.18 percent use water-sealed with other depository and 31.20 percent, water-sealed with sewer or septic tank. Rural households are apparently switching to modern toilet facilities with 38.19 percent using water-sealed with other depository and 23.24 percent, water-sealed with sewer or septic tank. The proportion of households using the closed pit is higher in rural (18.14%) than in urban areas (12.23%). About 10.33 percent of the rural and 4.74 percent of the urban residents use the open pit. In both the urban (0.19%) and rural (0.12%) areas other types of toilet facilities are seldom used. Households without toilet facilities comprise 5.46 percent in urban and 9.98 percent in rural areas (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

In 1970, 53.66 percent of the total households had radios; only 0.10 percent owned television sets and 0.98 percent, refrigerators. A decade later 70.65 percent are owners of radios; 2.00 percent, television sets and 2.19 percent, refrigerators or freezers. Ownership of these appliances is higher among urban than among rural dwellers. More than three-fourths (78.77%) of the urban households own radios; 5.12 percent, television sets and 4.33 percent, refrigerators or freezers. The corresponding proportions of rural households with these appliances are 67.73 percent, 0.88 percent and 1.42 percent (Table 9).

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or UN, ILO or USAID officials who, like diplomatic representatives, are subject reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- All patients, including those just confined, in mental hospitals, leptosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- Patients who have been confined for six months or longer as of May 1. 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- Nurses in nurses' homes who do not usually go home at least once a week.
- Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.
- 3. WELFARE INSTITUTIONS (Homes for the Aged and Infum, Orphanage, Boys'
 - All immates or wards, including those just confined.
 - ь. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a

4. CORRECTIVE AND PENAL INSTITUTIONS

- All prisoners in national prisons and reformatories (weltareville).
- Prisoners and detainess in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS

- Monks, priests, ministers, nuns, seminarians etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- Students in boarding schools (schools where students are required to stay in the school campus).
- Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

6. MILITARY CAMPS AND STATIONS (PC, Army, Air Force and Navy): PMA

- Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval ressels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- Detainees who have been contineusly confined for six months or longer, including confinement elsewhere, as of May 1, 1980. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a
- LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS: PLANTATIONS AND AGRICULTURAL/FISHERIES LXPI RIMENTAL OR BREEDING STATIONS, ETC.
 - Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc.) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

B. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS

- Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every
- Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

9. REFUGEE CAMPS

Filipino ertizens working and living inside the camps
